

Architect

J2 Building Consultants, a leader in the building envelope consulting niche, is seeking a versatile architect and draftsman for immediate full-time hire to join our powerhouse team!

J2 is a fun, fast paced environment of like-minded professionals looking to make a difference in building owners and managers lives by restoring their damaged buildings. We love residential and commercial buildings ranging from apartment complexes, to offices, to dot.com houses. We collaborate. We laugh. We work hard every day. We are J2. Check us out here: J2consultants.com

Are you a highly self-motivated person with a go getter mentality who believes anything worth doing is worth doing well? Do others describe you as a passionate leader who possesses a customer service attitude? Are you an analytical and creative thinker who enjoys seeing the whole vision of each project? Do you naturally take ownership and track details to completion?

If you don't like getting uncomfortable or being forced into lateral-thinking situations - you'll hate working with us... But if you're proactive, truly passionate about the art of architecture, and love a constant challenge...keep reading, because this is the job for you...

As one of our architects, you will be responsible for the production of design details, architectural document sets, permit submittals, inspection/evaluation of building envelopes, damage, decay, construction defects, waterproofing details and construction administration of the necessary repairs.

Our ideal candidate:

- Knows that to be a successful Architect you must be self-motivated but also able to understand the logistics of your initiatives;
- Is willing to jump in and solve problems and become the expert whenever needed;
- Is not afraid to try new techniques and offer insight to the business owner;
- Is hungry and highly motivated to work and will always give 150%; and
- Likes to run downhill with a project, take chances, and own it to the very end!

Skills/Requirements:

- A bachelor's degree in architecture or equivalent;
- License in the state you are applying and preferably NCARB certified;
- A minimum of three years of AUTOCAD design production experience in an architectural, engineering or construction office involved in multi-family housing, commercial and new construction;
- Proficiency with CAD;
- Proficiency in Sketch-Up is a plus;

- Design and production of structural repair details, project specifications, and repair plan sets;
- Knowledge of MS Office products and usage of Outlook for scheduling;
- Follows through and gets things done;
- Construction experience is a plus;
- Needs little direction to start a project and run with it;
- Willingness to take calculated risks;
- Ability to handle multiple moving parts at once;
- Mindset to set goals and then take action to fulfill them;
- A sensei master of organization and management;
- Able to bounce back from constructive criticism with renewed dedication;
- Always learning, growing, and expanding your boundaries;
- Desire to be a part of something bigger than yourself;
- Is a naturally gifted communicator; and
- Works hard but likes to have fun while getting things done!
