

## CAD Drafter

As one of our drafters, you will be expected to assist with the development of initial designs to permit ready plans. The successful applicant will have a thorough understanding of building components and a good working knowledge of architectural construction document development. Experience with building enclosure and waterproofing techniques is a plus!

We are seeking someone who is geared towards problem solving and has good solid self-management and communication skills to collaborate with clients, industry partners, and co-workers alike.

### Qualifications:

- 3+ years experience in a design office
- Proficient AutoCAD experience required
- Photoshop or Sketchup knowledge
- Strong technical skills

### Responsibilities:

- Draft building enclosure details and assist in compiling full sets of design documents
- Manager in-house digital library, standards, and systems
- Handle technical and production aspects of projects
- Mainly an office position, but may include site reconnaissance for specific details and as-built conditions
