

Why Hire a *Building Doctor*

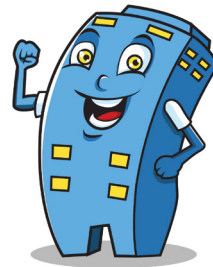

We diagnose, prescribe, and treat buildings damaged by age, construction defects, disaster, or neglect

Building condition assessments, building envelope design and remediation, design and engineering services, comprehensive project management and construction administration services

Our building design specialists are trained to perform quality assurance (QA/QC) field inspections, ensuring that the building envelope systems are properly installed, per the project plans, and the manufacturer's installation guidelines

Full-service design and construction management firm specializing in building envelope design for existing buildings

J2 helps multifamily and commercial building owners make their buildings work right again. Our team has developed a simple process to help you understand the problem you are facing, suggest the right cost-effective repairs, and provide leadership to the repair process. Our specialized expertise in occupied residential and commercial water intrusion remediation allows us to resolve water damage and provide long-lasting and cost-effective repair solutions, saving our clients time and money.

J2 Building Consultants was founded by Jens Johanson in 2007 to guide forensic analysis and building envelope repairs for homeowners associations, building owners, property managers, attorneys, and contractors. From Washington, Oregon, and Utah, J2 has expertly managed projects across the country. Our core mission is to offer help, hope, and happiness to owners of sick buildings. Every building presents a fresh set of challenges. We are here to understand your circumstances and be your representative in the repair process.
